

Student 1

student1@test.com | CGPA: 8.26

Tailored for: Software Engineer at TechNova Solutions

PROFESSIONAL SUMMARY

As a skilled and detail-oriented software engineer, I am excited to apply for the Software Engineer position at TechNova Solutions, utilizing my strong foundation in Python and SQL to drive innovative solutions. With a solid understanding of REST APIs and a passion for building efficient systems, I am confident in my ability to contribute to the team's success. I am eager to expand my skill set to include Django and explore its applications in software development.

KEY SKILLS

Python | SQL | Django (eager to learn and apply) | React | REST API development

PROJECT EXPERIENCE

- ? Built a Flask REST API, designing and implementing multiple endpoints to handle various HTTP requests, resulting in a fully functional API that efficiently managed data exchange between clients and servers.

EDUCATION

- ? CGPA: 8.26
- ? Currently pursuing degree in Computer Science or related field, with a strong academic record and a solid foundation in computer science principles and software engineering practices.
